ABSTRACTED-PUB-NO: RU 2055614C

BASIC-ABSTRACT: The vehicle consists of a chassis (1)
carrying a body (2) in
the form of an armoured casing using on a self-propelled
artillery weapon. The
body contains a tank (3) of a fire-extinguishing liquid and
a pump (4),
connected by a hose to a nozzle (5) from which the
extinguishing liquid is
delivered to the fire. The nozzle is mounted on a
controlled turret (9) on top
of the vehicle, with a sighting instrument (11) to observe
the trajectory of
the liquid.

USE/ADVANTAGE - Suitable for extinguishing fire in
explosive dump. Greater

safety for fire fighting personnel.
